FOR IMMEDIATE RELEASE

New Partnership, Achieve Telecom Network and Learning House Working Together to Narrow the Digital Divide

Everyday one hears about the tremendous advances in technology and telecommunications. Advanced technologies are allowing people to learn and work in ways unheard of just a few years ago. However, these advancements in technology can only be taken advantage of if they are accessible. The term "digital divide" is often used to refer to the lack of access some institutions and individuals have to the latest technological innovations. Achieve Telecom Network and Learning House are two companies focused on narrowing the digital divide.

Learning House is proud to announce its new partnership with Achieve Telecom Network. Achieve Telecom Network, headquartered in Canton, Massachusetts, and Learning House share the vision of making quality educational opportunities available to all learners. Achieve Telecom works to overcome the digital divide by making high quality telecommunications services available to K-16 schools and colleges in urban and rural America. Learning House's library of online course content and turnkey infrastructure distance learning technologies, and Achieve's robust telecommunications services, called AchieveXpress makes for a terrific partnership. The two companies will be able to provide institutions with affordable access to the latest technologies and online learning opportunities.

Joy Jackson, President of Achieve Telecom Network, states, "Achieve Telecom is very excited to partner with Learning House to provide schools and colleges the best distance learning technologies and content offerings available in the marketplace. AchieveXpress offers best in class technology for delivering high quality content."

Denzil Edge, President/CEO of Learning House notes, "more than 2.6 million postsecondary education students took a class online during the 2004." Learning House is creating digital eContent that can be used by instructors using a wide range of course management systems to deliver their online courses. Institutions of higher education can order a specific library of eContent to be used across a particular discipline or program. For these reasons, Learning House is pleased to partner with Achieve Telecom Network in addressing the growing field of eLearning."

About Achieve Telecom Network.

Achieve Telecom provides a fully managed comprehensive telecommunications service that permits video, audio and text files to be transmitted from one site to one or more sites for use by educational institutions and libraries. AchieveXpress meets the new demands for educational and instructional performance by providing the distance learning network to allow for the delivery of enriched, interactive learning for customer-wide communications of curriculum standards with coordinated lesson planning, content alignment, and teacher development.

About Learning House, Inc.

The Learning House, Inc. was founded in 1985 by Dr. Denzil Edge. It is a comprehensive eLearning company that develops customized eContent, as well as audio and video products; hosts and leases course management systems; leases or sells eContent; and provides 24/7 Help Desk services, project management services, consultation and research services, editing services, and staff training for its clientele. The Learning House, Inc. provides eLearning services to numerous institutions of higher education, professional organizations, government agencies, and businesses.
